

Environmental Policy STAR7

Vision

STAR7 believes that, in order to strengthen the company's competitiveness and profitability in an increasingly demanding market, it is essential to achieve and maintain a position of excellence — not only in the ability to deliver quality services and products, but also in the ability to do so in full compliance with legality, environmental sustainability principles, and compatibility with the surrounding territory.

Mission

STAR7 has implemented an Environmental Management System compliant with international regulatory standards, designed to ensure control and awareness of its environmental aspects and impacts. The system aims to guide the organization toward the continuous improvement of its environmental performance.

Founding Principles

STAR7 is concretely committed to respecting the following principles:

- To prevent environmental pollution whenever possible;
- To comply with legislative and regulatory requirements applicable to its services/products, processes, production means, and facilities;
- To assess the significance of its environmental aspects and impacts, incorporating the results into daily practices and business development;
- To monitor processes and environmental performance in order to identify potential areas for improvement;
- To pursue continuous improvement in environmental performance, including:
 - o Selecting suppliers relevant to environmental impact, verifying their compliance with STAR environmental principles, and establishing relationships aimed at continuous improvement of their environmental performance;
 - o Improving waste management and separation processes;
 - o Optimizing energy consumption;
 - o Training and raising awareness among employees and suppliers whose activities influence the company's environmental aspects.
